**SUBMISSION OF CORRECTED TRANSLATION
OF INTERNATIONAL APPLICATION AS FILED
(35 U.S.C. § 371 (c)(2))**

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450
Sir:

Applicant attaches hereto a corrected translation of the Japanese language International Application No. PCT/JP2004/004481, which is the International Application upon which the present National Stage application is based. New matter is not present in the corrected translation.

Applicant previously submitted a translation of the International Application on October 3, 2005, but that translation contained errors.

In particular, an error appeared at page 4, last paragraph, where the last line should have read as follows, with the underlining indicating additions and the strike-through indicating deletions:

--silicon groups ~~means~~ includes the plasticizer component and the polyoxaalkylene polymer having no reactive silicon groups.--

In addition, an error appeared in the paragraph spanning pages 25 and 26, where the last line should have read as follows, with the underlining indicating additions and the strike-through indicating deletions:

--plasticizer, it ~~means~~ includes the plasticizer component and the polyoxaalkylene polymer having no reactive silicon groups.--

During prosecution, the specification of the present application was amended in an Amendment Under 37 C.F.R. § 1.111 filed on September 3, 2009 to correct the above errors. The enclosed corrected translation contains the above two corrections.

During prosecution, the specification of the present application was amended in a Preliminary Amendment filed on October 3, 2005 to correct a typographical error that occurred in the original Japanese-language PCT International Application. That a typographical error occurred is clear from page 23, lines 10 to 12 of the specification. The corrected translation contains this typographical error since the typographical error occurred in the original Japanese-language PCT International Application. Applicant is filing concurrently herewith an Amendment which again corrects this typographical error to ensure that this amendment is made to the corrected translation.

During prosecution of the present application, the claims have been amended. Applicant requests that the claim amendments be retained.
